

THE INFORMATION ABOUT THE ENVIRONMENTAL PROTECTION IN CROSS ARENA PREROV

1. The competitors and their teams are responsible for the production and the manipulation with hazardous waste.
2. It's necessary to use a tin bath or an impermeable canvas under the racing cars in the paddock at the expense of the competitors or their teams.
3. The organizer set up a space for storing hazardous waste in the paddock. This space is designated as ECO POINT and the access to it is marked in the map of the paddock, which is located on the official scoreboard.
4. On the ECO POINT stand there are placed collection containers for hazardous waste:
 - Plastic waste – *waste code 150102* – this collection vessel is permitted to store empty plastic containers of petroleum and other hazardous substances (e.g. oil, brake fluid, grease, etc.).
 - Metal packaging – *waste code 150104* – this collection vessel is permitted to store empty metal containers of petroleum and other hazardous substances (e.g. oil, brake fluid, grease, etc.).
 - Absorbents, filtering materials, wiping cloths and protective clothing contaminated by hazardous substances – *waste code 150202* – the collection vessel is allowed to store solid materials (e.g. apex, fibroil, sawdust, textile, paper – contaminated (drenched) by oil substances or other hazardous substances.
 - Oil filters – *waste code 160107* – the collection vessel is allowed to store filtering materials with sorbate petroleum substances from the filtration process of engine oils with adhering solid particles that may contain other dangerous substances.
 - For each collection vessel there is an “identifying list of hazardous waste” where are specified procedures for dealing with this specific waste, localization of the crash, first aid, etc.
5. In the paddock there is also a container for mixed municipal waste – *waste code 200301* – this collection vessel is allowed to store ordinary municipal waste.
6. It's prohibited to store another type of hazardous wastes than those which are specified in the article 4 and 5 of this document.
7. In the whole area of CROSS ARENA PREROV it's prohibited an unprofessional manipulation, saving and spilling of the petroleum products and chemical substances, that could damage the environment, e.g. petrol, diesel oil, grease, brake fluid, thinner, etc. These substances are an exclusive property of the competitors and their teams, who are completely responsible for them.
8. In case of any kind of ecological accident, please, contact our Driver's Licence Officer. His telephone number is + 420 776 882 067.
